Subject: Gas Rate increase

I believe that Mr. Ball has it right. Why should I be made to pay for something that I am not receiving? We along the Wasatch front have had to pay for Questar to provide gas to homes when we purchased the lots that our homes are built on through the price of the lots that the developer sells. No one offered to lower those costs to me and my neighbors by making the people across the state pay more for their gas. The people in the areas affected must have requested that they be connected to Questars system now they have to bear the cost of their request. This seems only fair after all they are the ones who requested this. Questar should stay out of this they get their money either way.
